

# AKX

Built to perform.  
Engineered for your success.

STX - UK

# Driven by Purpose

At STX-UK, we believe a horsetruck is more than transport, it's the link between your passion and your goals. Every journey carries not only horses, but dreams, ambitions, and trust. That is why the AKX-line is built with a clear mission: to make every ride effortless, safe, and reliable.

Born from the heritage of Stephex Horsetrucks, the AKX combines decades of craftsmanship with a fresh vision. Its sporty and dynamic design reflects energy and movement, while the "less is more" philosophy keeps the focus on what truly matters: durability, functionality, and safety. At the same time, every element of the truck is shaped by a deep commitment to both riders and horses, offering comfort, strength, and confidence on every road.

# Why choose the new AKX?

The new AKX has been redesigned to give riders and horses even more comfort, safety, and reliability. It keeps the trusted quality but now with smarter details, a cleaner look, and features that make every journey easier. Built on a strong chassis and finished with a modern design, the AKX is the perfect partner on the road.

## Upgrades that make the difference

- > Composite flooring: durable and odor-resistant
- > Faux leather seating: sleek, professional, easy to maintain
- > Kevlar wheel arch protection: for extra safety for horses
- > Completely redesigned exterior: fresh and modern look
- > New chassis upgrades on Opel Movano & Renault Master

## Essential features of the new AKX

Standard aluminum wheels – strong and stylish  
Integrated camera system – better visibility & safety  
Smart and practical layout – efficient use of space  
Premium build quality – Stephex craftsmanship  
Optimized driving experience – smooth and comfortable
